

# The Token Tech #2000™ High Security Token Dispenser

The Token Tech #2000™ is a well proven, high-security token dispenser, representing the ultimate in control, accuracy, security and dispensing reliability. It offers push-button operation, with built-in memory, and fail-safe, hardened circuitry. It features a pre-dispense LED display, with an automatic error re-set control button. Operation is standard 110 Volt power. (220 Volt Models built to order).

The dispenser is a two-key, double-lock system, with a non-resettable counter. Vended token readings (totals) can be taken on a daily, hourly, or work shift basis. The dispenser is designed to be completely pilfer proof, and theft proof. It has the option of being bolted to a counter or wall, if desired.

The Token Tech #2000™ comes with a 10-foot remote control unit, which can be either hand-held, or mounted on or near a cash register, for more convenient use.

Hopper capacity is from 6,000 to 10,000 tokens, depending on token size. It can be used with a wide range of tokens, including all of those now in use.

Each dispenser has a display frame ready for you to insert your own Display Sign. Easily printed on your desktop printer, the dimensions are... Width = 7.87" (200 mm), Height = 8.97" (228 mm). We suggest black ink on medium weight card stock. Clear plastic laminating will keep your sign clean and new-looking for years.

Dimensions of the Dispenser are approx. 8 x 12 x 18 inches. Weight is about 135 lbs., fully loaded with tokens. Dispenser housing is heavy gauge steel, with hard acrylic Computer Grey finish.

Shipping Box = 20.5 x 16.0 x 11 inches  
(52.0 x 40.63 x 27.94 cm.)

Shipping Weight (110 Volt Model) = 36 lbs. (16.3kg)  
(220 Volt Model) = 46 lbs. (20.8 kg)

Note: The 220 Volt Model has a built-in Transformer which accounts for the difference in weight.

*When ordering, Customer should specify Token Size, Control Token Number, or send samples of Tokens or Coins which will be used in Dispenser.*

## Simplified Control Operation

The Operator's Control Panel has been designed for accurate and simple use. There are only Six Instruction Buttons:

Encode Count Buttons =

RESET (Clear Count) =

START (Dispense Mode) =

Pulses from each Count Button add to the total on the Bright Red LED Digital Display. The operator reads the total displayed, to confirm and verify that total is correct. If total is correct, the operator then pulses the  Start Dispense Button.

If total is incorrect, the operator pushes the  Reset Count Button, which clears the LED Display to zero. He then pushes the Count Buttons, for a correct total, before pushing the  Start Dispense Button.

# Token Tech 2000™ High Security Token Dispenser

## User Reports

*"We just passed the 3-million count on our first Token Tech. This one, and our other 4 are working fine."*

*"We really liked our first Token Tech, which is why we ordered our second. I'm calling now to order our third."*

*"The Token Tech eliminates the need to spend hours making up rolls of 20 and 40 Tokens. We are saving enough labor cost to more than pay for it in less than two months."*

*"The best investment since we bought our fax machine. I can't ever imagine doing business without either one."*

*"We have good employees . . . The Token Tech removes the temptation for them to become "silent partners" by skimming the till."*

*"It's great! You should have come out with it 10 years ago."*

*"The Token Tech eliminates long lines at our cashier's cage. Our customers like it, too!"*

*"Our Batting Cage Tokens are valued at \$1 each. Anyone with a high-value Token should be using a Token Tech."*

*"The first two Token Techs are excellent. We are sending our purchase order for six additional units."*

*"We were using a system which had the "illusion of control" . . . The first shift manager counted all our Tokens. The third shift manager emptied all the cashboxes, and did a day-end count."*

*"The Token Tech has simplified our whole operation, and we know exactly where we stand every hour."*

*"We bought a similar item, made in Europe. It cost a lot more, but it never worked right, so we sent it back. Your Token Tech is far superior."*

### Special Note

The Token Tech #2000 should *not be considered* for use with Aluminum or Plastic Coins or Tokens.

Tokens with grooves, or with irregular shapes will cause problems and are *not suitable* to use with the Token Tech.

### Routine Replacement Parts & Components

For Token Techs in use beyond the Standard Warranty period of one year, or for extra Remote Controls, etc., we keep an inventory of such items, usually available for immediate shipment. Please advise the Serial Number of your Dispenser.

### Dispensing Coins

The Token Tech #2000 can be used to dispense Coins. Any Coin within the range of 20.32 mm to 28.57 mm diameter (.800 to 1.125 inches) is possible. This should be specified when ordering.

In many Countries, it is not possible to use "Bill Changers" because of the size and variations of the Currency in that Country, and/or due to the fact that Currency Validators (Readers) have not been developed or perfected for the Currency (Paper Money) of the Country involved.

Dispensing Coins is one of the reasons for the New Encode Button Options for the Remote Control.

### Warranties and Guarantees

The Token Tech #2000 is offered with a 30-day return guarantee, with full refund, excluding shipping charges. If you are not completely satisfied, for any reason, you may return your trial order. Returns under this guarantee must be authorized with prior written notice and approval, and with shipping charges prepaid. Returns must be securely packaged for safe transit, and fully insured. Damaged returns will not be accepted under this guarantee.

The Token Tech #2000 is sold with a one-year warranty from date of shipment, against any defects in workmanship or serviceability. *Defects which might be caused by misuse or abuse of the products will not be honored, and will void this warranty.* No other guarantees or warranties are implied or expressed.

*All Guarantees and Warranties are non-transferable, and apply to the Original Purchaser only.*

## Nosotros Lo Hacemos Posible

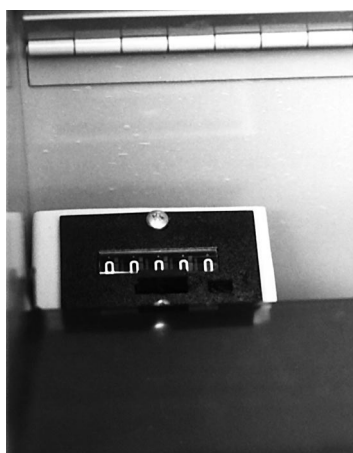

# Token Tech #2000™ Dispenser: Standard Features & New Options

**T**hese two illustrations show the rear view of the Token Tech Housing. At the lower back of the unit, you see:

- (A) The Primary Counter with Viewing Lens. This Counter has 6 Digits, and is NON-RESETTABLE. The daily “Start Count” is recorded, and is subtracted from the “Ending Count”. The difference is the total Tokens dispensed.
- (B) Connector Port for Remote Control Cable.
- (C) The “On-Off” Switch.
- (D) Power Supply Cord with Safety Strain Relief.

**T**hese two illustrations show the New & Optional Manager’s Second Counter. It is accessible Only when the Manager opens the Security Cover to load additional Tokens. This is a 5-Digit Counter, and is PUSH BUTTON RESETTABLE to zero (00000).

Both Counters are pulsed when dispensing, and both register a Continuous Count. The Manager’s Second Counter eliminates the need of subtracting a 6-Digit (Starting Count) Number from a 6-Digit (Day’s End) Finishing Count.

The Manager’s Second Counter is positioned under the Safety Feed Ramp, and does not interfere with the Token feed to the Rotary Hopper.

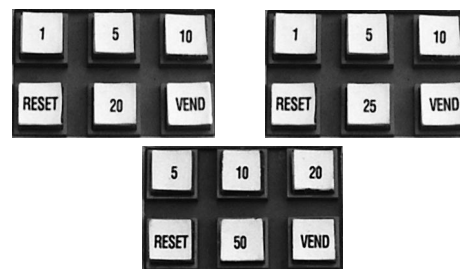

**T**he Standard Remote Control has Input Buttons 1-4-20-40-Reset-Vend. You can easily get to ANY desired Dispense Count. The Bright Red Display starts with “0” and increases with each Button pushed.

*To dispense 9 Tokens, you would push 4+4+1. For 25 Tokens, 20+4+1.*

If you make a mistake, and the Display is incorrect, then you push the “Reset” Button which returns the Display to “0”.

When the Display reads the desired Dispense Count, push the “Vend” button, and the Dispenser proceeds with the dispensing operation.

Several of our Customers have requested Special Input Buttons. These Options are now available:

Dispensers ordered with any of the Special Input Buttons shown here have an Additional Charge of \$50.00 for each Dispenser.

### Large Hopper Capacity

When filled to capacity, the Token Dispenser weighs about 135 pounds. Capacity depends on size of Token, as shown below. For sizes other than those listed, Dispensers can be built to order. Quotation on request.

Token Size	Capacity	Token Size	Capacity
.800	10,000	.984	7,500
.882	9,000	1.000	7,500
.900	9,000	1.125	6,000

Coin	Capacity	Coin	Capacity
US Quarter	7,000	Brazilian 20 Cruzados	4,500
Canadian 25¢	8,000	Venezuela 1 Bolivar	5,000
Australian 20¢	5,000	Chile 1 Peso	4,500
Canadian Dollar	6,000	Ecuador 1 Sucre	4,000

### Non-Resettable Counter

Any total desired can be counted and vended. The TOTAL VENDED COUNTER is completely tamper-proof and NON-RESETTABLE. Hourly, daily, work-shift, etc., readings can be taken, for Total Tokens Vended in that time interval. The total is determined by subtracting the previous reading from the current reading.

It is a good idea to keep an on-going Managers Log Book or Diary for these records. Also, some managers insist that both he and the employee read the totals, and the employee is often asked to sign or initial his confirmation of correct readings. This is recommended especially when high-value Tokens are involved.

### Lock-Out Feature

Dispenser cannot be operated unless Manager's Key is inserted and turned to the ON Position. In the event of a power failure, or mechanical malfunction, the Dispenser automatically shuts down. If there is a power outage during a vend countdown cycle, the Dispenser remembers the balance due the customer.

### Countdown & Memory Features

The LED Digital Display shows the "countdown" as the hopper is dispensing Tokens. Hopper payout is fast, and without interruption. If there is a hopper run-out during a vend mode, the balance due count shows on the Display. Let's say, for example, that you are in the process of

vending 20 Game Tokens for your customer's \$5.00 bill. The Dispenser stops vending at 16 Tokens, because the hopper is empty. The Display will read "4" as the balance due. The memory circuit remembers this balance until it is paid out, or until the Reset Button is pushed, clearing the Count Circuit.

### Examples of Operating the Dispenser:

Arcade Tokens are valued at 25¢.

Encode Count Buttons ..... **Add \$ 50.00**
- Manager's Second Counter  
Re-Settable Push Button ... **Add \$160.00**

Remittance in full with order. Prompt refund on 30-day trial. Refund does not include the shipping charges.

Prices are FOB Cincinnati, OH, USA.

### Point of Sale Model

By popular request, tokens can now be dispensed, counted and totaled by your cash register with the P.O.S. Tech 2000. With just a standard RS 232 link and the included software, the cash register can control token vending - no remote control needed. Up to 255 tokens can be dispensed at one time. The P.O.S. Token Tech can be configured for all sizes of tokens from 0.800" to 1.125" and is available in 110-115 volts only.

P.O.S. Token Tech 2000™ ..... \$1,699.00

Prices are FOB Cincinnati, OH, USA.
